

Yes we are different, because we think differently.

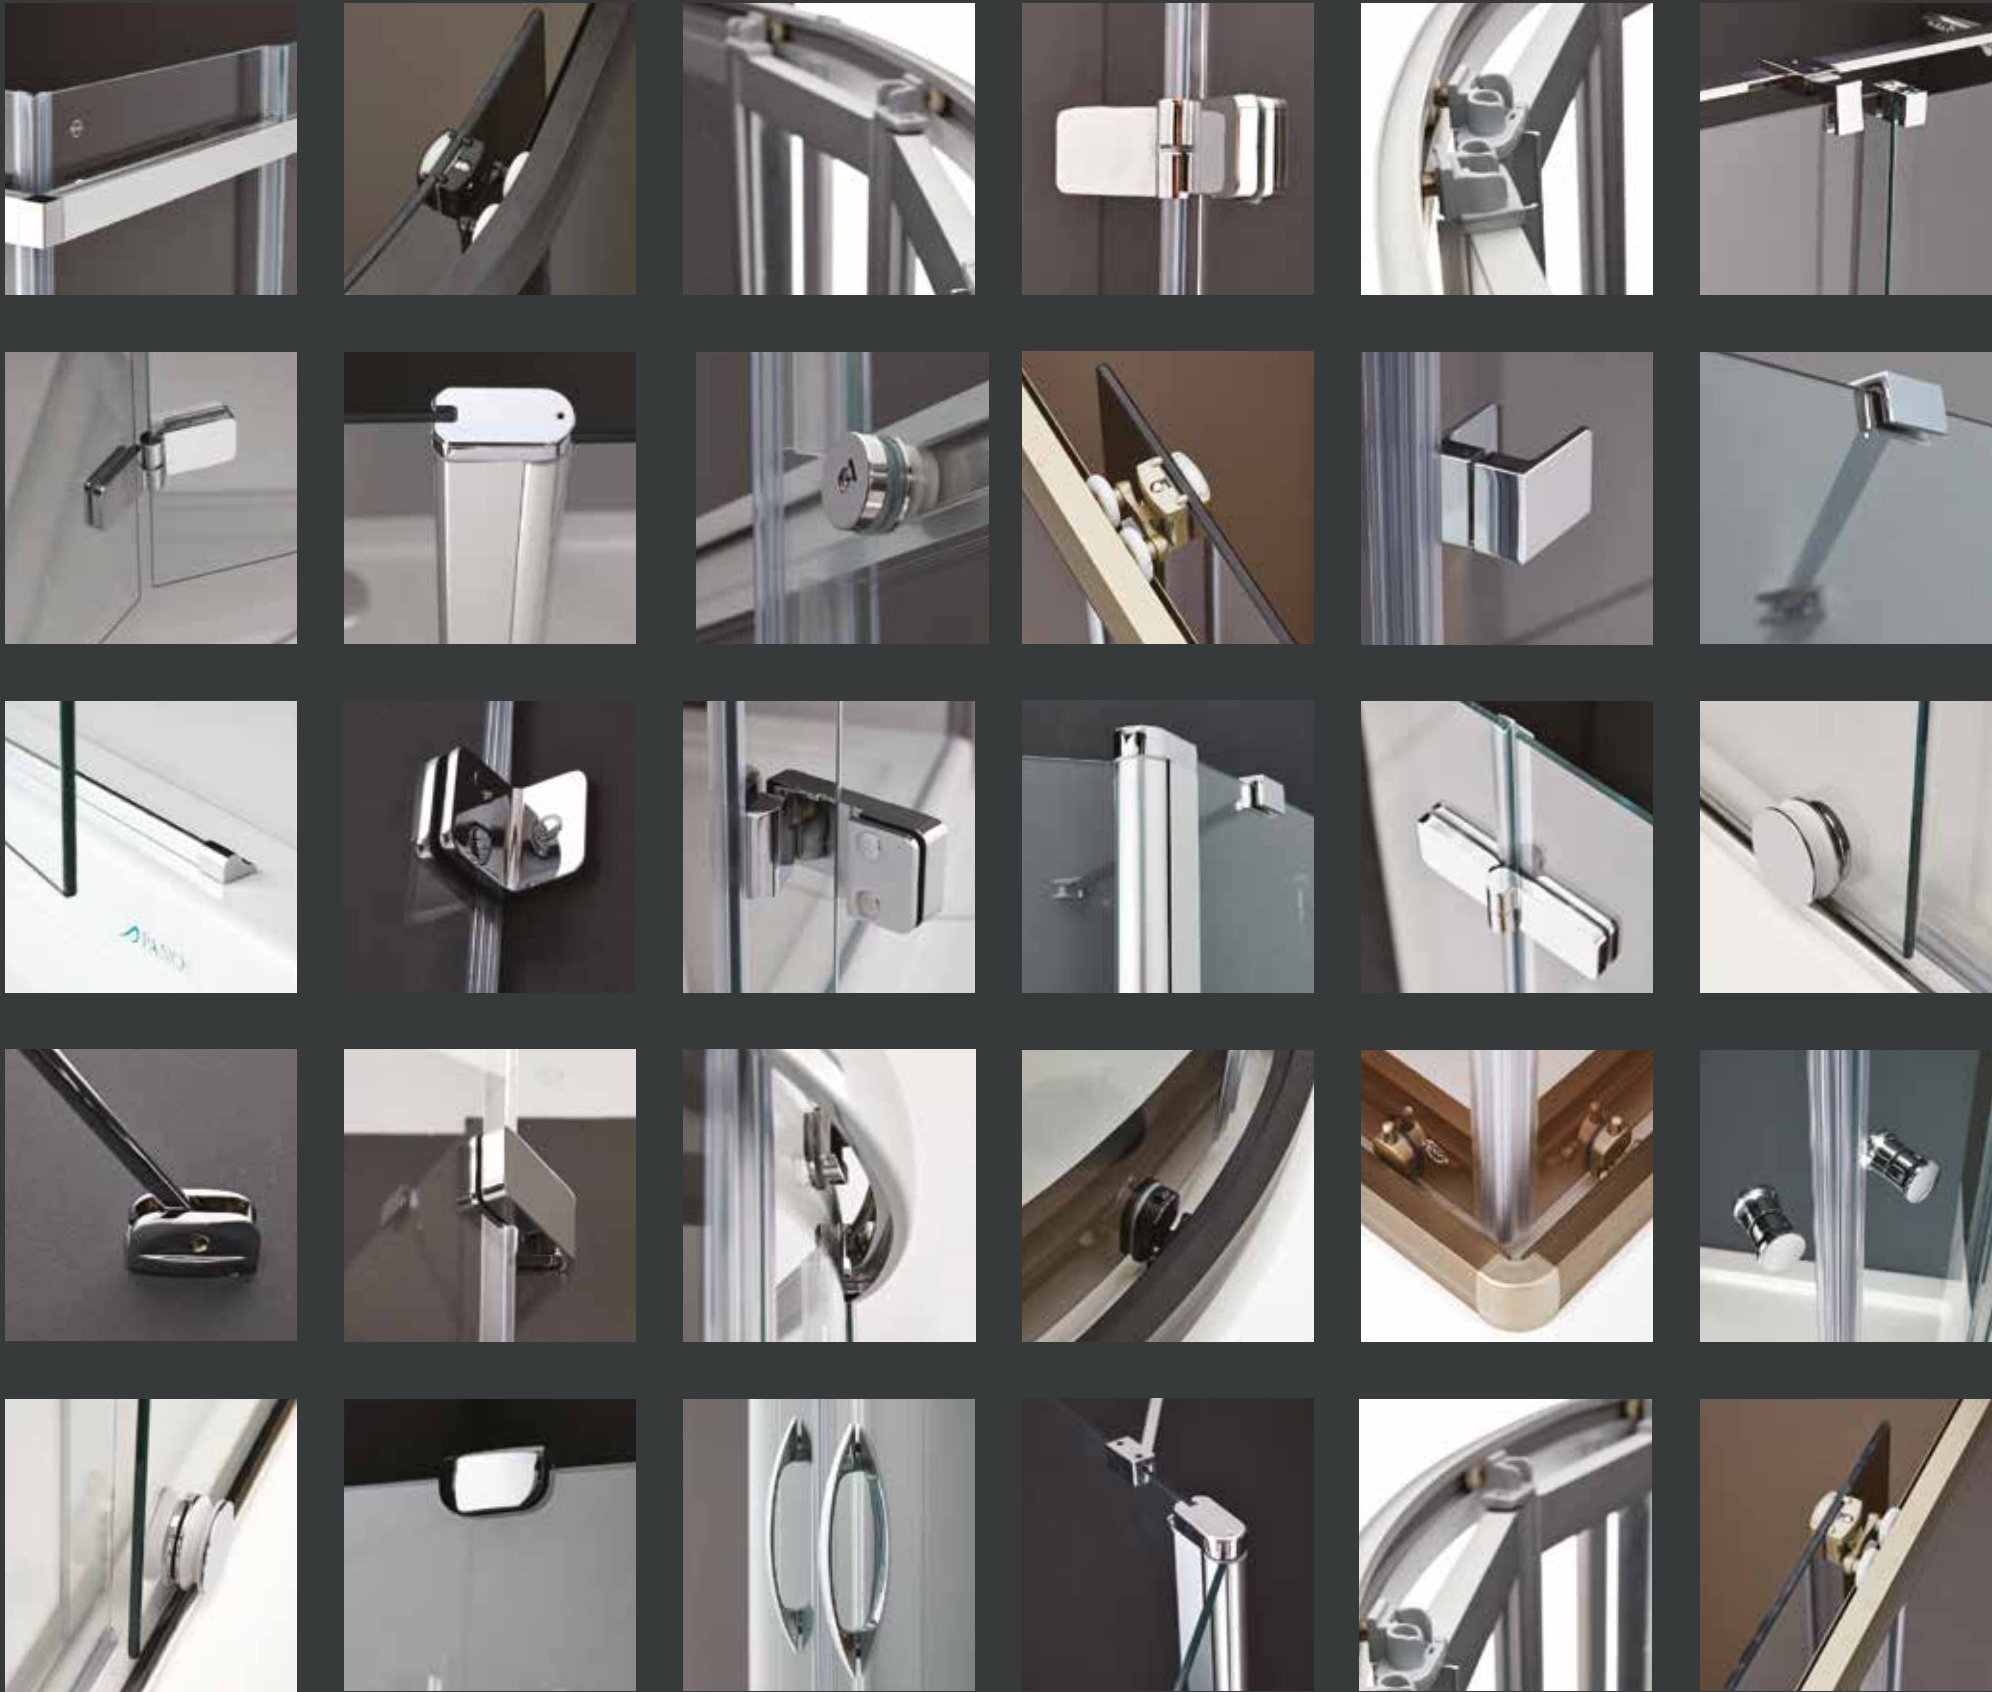

FOR THE QUALITY SEEKERS...

PANO architecture is the only modern factory that operates in a 6,000 m² area with its well experienced working staff. It has been producing modern, high quality and unique shower enclosures since 2001. Since then it has set up a high selling business trade in the Aegean Region and the Mediterranean Region. PANO architecture is always known for its high quality service link that it provides to its customers in shower enclosures, acrylic bathtubs and shower trays, ventilation grills. Everything that is produced in our factories in Turkey are of high quality, made of first class feedstock.

Prior to the customer satisfaction we've never given up from the quality of our products and what's more we've always tried to come up with new and special designs.

We all know that a high quality life only remains in a high quality bathroom.
